***Allowable Subject Matter***

10. Claims 1-6, 8-12 and 14-27 are allowed.

11. The prior art made of record and relied upon by the Examiner fails to teach or even suggest "A mobile terminal, comprising: a display screen; an input system for receiving user input; a wireless communications subsystem; a processor; memory storing computer executable instructions that, when executed by the processor, cause the mobile terminal to perform a method for retrieving data from a server, comprising: (i) loading a first or second local client executable application for decoding a coded short text messaging system message; (ii) receiving the coded short text messaging system message from a content provider via the wireless communications subsystem, wherein the coded short text messaging system message comprises compressed data; and (iii) decoding, by the first or second local client executable application, the received short text messaging system message using a set of short codes that comprises short codes unique to the first or second application and instruct the first or second application to translate at least a portion of the received short text messaging system message into a human understandable format, and administrative short codes that are consistent for the first and second applications and used to instruct the first or second application; (iv) displaying information based on said received and decoded unique short codes; and (v) instructing said application based on said administrative short codes." recited in independent claims 1, 19, 25 and 27.

12. Dependent claims 2-6 and 8-9 depend on allowed base claim 1; claims 20-24 depend on allowed base claim 19, and claim 26 depends on allowed base claim 25, thus, these claims are also allowed.

13. In addition, the prior art made of record and relied upon by the Examiner fails to teach or even suggest "A computer readable medium storing first and second client applications in the form of computer executable instructions that, when executed, cause a mobile terminal to perform a method for receiving information relating to a selected topic, comprising: (i) querying a user of the mobile terminal to select one of a push or pull mode of operation; (ii) when the user selects the push mode of operation:

- a. displaying a plurality of menus to allow the user to identify desired information to remain updated, to identify one or more criteria specifying how often to receive updates, and to identify a number of prepaid messages;
- b. generating a coded short text messaging system message based on the user's selection of the push mode of operation, and further based on the user's selections regarding desired information, criteria, and number of prepaid messages, wherein the generating of the coded short text messaging system message comprises translating a short text messaging system message that is in a human understandable format into a coded data format not understandable to the user of the mobile terminal; and
- c. outputting the short text messaging system message for sending to a content provider associated with the first or second client applications via a wireless telecommunications network; (iii) receiving a coded short text messaging system response message from the content provider via the wireless telecommunications

network, wherein the coded short text messaging system response message comprises compressed data; (iv) decoding, by the first or second client application, the received short text messaging system response message using a listing of a set of short codes that comprises short codes unique to the first or second application and used to instruct the first or second application to translate at least a portion of the received short text messaging system message into human understandable information, and administrative short codes that are consistent for the first and second applications and used to instruct the first or second application; and (v) displaying the human understandable information on a display screen." As recited in independent claim 10.

10. Dependent claims 11, 12 and 14-18 depend on allowed base claim 10; thus, these claims are also allowed.
